To whom it may concern:

Ntegrity Computer Solutions, Inc. has been administering our network for over five years and have done an excellent job doing so. They originally installed my network that included ten work stations. They were there when we moved our offices, experienced ISP problems, performed disaster recovery, and have done a thorough job in keeping our network up and going as well as training our employees to use the system. In addition, I am able to contact them at any time for free telephone support. Their readily available help keeps my business productive.

For these reasons, I strongly recommend Ntegrity for all of your cabling, hardware and networking needs. They are like a trustworthy car mechanic that you can count on not to take advantage of you.

Sincerely,

Scott Pettifer, MAI, SRA
